

Task0: Tool setup and simple SQL

You are required to do the following

- Create Datagrip project and connect to PostgreSQL database with your credentials.
- Create database named **sailor_db**
- Create file named **sailor_db_ddl.sql** which contains the definitions of the following tables and execute this file on sailor_db database

- Add the attached files **sailors.sql**, **boats.sql** and **reserves.sql** (by drag and drop) to your project and execute them to insert the data into the tables.
- **Record a video** showing the above steps. (for lower video size you can use **zoom** for recording)

Files to submit on GitHub: <https://classroom.github.com/a/BBvpjwCZ>

1. **sailor_db_ddl.sql**
2. **sailors.sql**
3. **boats.sql**
4. **reserves.sql**
5. **README.md** file contains your name, id and the **drive link (access to anyone)** of the recorded video

any other formats will not be accepted

Deadline: 11 /3/2025 @ 11:59 pm
